Version: October 2026 · Written in plain English · No technical knowledge needed

Contents

You do not have to read everything. Go to the part that matches your job. Part 1 and Part 2 are worth reading once by everyone.

Part 1 · Start here

- What is this software?
- Who uses it
- How to log in
- Finding your way around
- Simple word list

Part 2 · How a client moves through the clinic

- The journey, step by step
- The 5 session statuses
- Follow-ups explained

Part 3 · Receptionist guide

- Overview & Appointments
- New Booking (5 steps)
- Pending Payments
- Follow-ups
- Leads, Patients, Billing, Report

Part 4 · Therapist guide

- Schedule
- Complete a session
- My Clients & profile
- Case History, Notes, Follow-up
- My Session Reports

Part 5 · Clinic owner guide

- Overview & Analytics
- Services
- Staff, pricing & access
- Settings & Subscription

Part 6 · Clients & platform admin

- Public booking page
- Client tracking page
- Platform admin

Part 8 · Problems & fixes

- Common problems and how to fix them

Part 9 · Good habits & checklists

- Privacy, daily checklists, test logins

How to read the colour boxes

Blue = good to know. **Green** = a time-saving tip. **Yellow** = be careful. **Red** = something that can cause real trouble.

Start here

1.1 What is this software?

Mindesk (also called **Psyfos**) is the program your clinic uses to run the day. It keeps everything in one place:

- **Bookings** — who is coming, to which therapist, at what time.
- **Money** — what a session costs, what was paid, what is still due.
- **Client records** — each client's history, notes after every session, and how their case is going.
- **Follow-ups** — reminders that a client should come back, so nobody is forgotten.
- **Reports** — a monthly picture of the whole clinic, and one for each therapist.

You open it in a web browser (Chrome or Edge works best), on a computer, tablet or phone. You do **not** install anything.

1.2 Who uses it?

Every person has their own login. What you see on the screen depends on your **role**.

Role	What this person does	Main screens
Receptionist	Takes enquiries, books sessions, collects payments, books follow-up sessions, watches the monthly report.	Overview, Appointments, Follow-ups, Patients, Leads, Billing, Pending Payments, Monthly Report
Therapist	Sees today's sessions, runs the session, writes notes, updates the client's status, sets the next follow-up.	Schedule, My Clients, Case History, Session Notes, Follow-up, My Session Reports
Clinic owner	Sets up services and prices, adds staff and decides what each person can open, manages the plan (subscription). Can do everything a receptionist can.	Everything, plus Services, Staff, Settings, Subscription
Platform admin	Looks after all the clinics on the platform: approves subscription payments, suspends or helps a clinic. Does not see client records.	The separate <code>/admin</code> page
Client	Has no login . Books through the clinic's public booking page and follows the booking with a private link.	Booking page, tracking page

1.3 How to log in

- 1 Open the clinic's website address in your browser and go to the **Login** page.
- 2 Type your **email** and **password** (the clinic owner gives these to you).
- 3 Click **Sign In**. You land on your own home screen: therapists see **Schedule**; everyone else sees **Overview**.

The login page. Same page for receptionists, therapists and owners. The platform admin uses `/admin`.

Keep your password private

Never share it, even with a colleague. If someone needs access, the owner can create a login for them in **Staff**. If you forget your password, ask the clinic owner to reset it (see Part 8).

1.4 Finding your way around

Every screen has the same frame, so once you learn it, you know all of it.

The frame. Left: the **menu** (what you can open depends on your role). Top: the page name, a **search box**, the **light/dark switch**, the **bell** (items that need attention) and your **profile circle**. Bottom-right: the round **chat bubble** — a help assistant you can ask “how do I...?”.

- **Menu is shorter than you expect?** That is normal. Each person only sees what they are allowed to use.
- **Log out** with the small arrow icon at the bottom of the menu, especially on shared computers.
- **Coloured chips** next to a client’s name show their case status (see Part 2).

1.5 Simple word list

Word	What it means here
Client / Patient	The person who comes for help. The two words mean the same thing in the software.
Session / Appointment	One meeting between a client and a therapist, at a set date and time.
Service	The <i>kind</i> of session: Counselling, Therapy, Assessment, Career, or Other.
Therapist	The psychologist or counsellor who runs the session.
Session status	Where the client’s <i>case</i> stands: New Case, Ongoing, Periodic Follow-up, Terminated, or Dropped.
Follow-up	A reminder that this client should come back by a certain date.
Session notes (SOAP)	The therapist’s write-up: S ubjective (what the client said), O bjective (what you saw), A ssessment (your view), P lan (next steps).

Pending payment	A confirmed session where money is still to be collected at the front desk.
Lead	Someone who showed interest (for example, through the booking page) but has not booked yet.
Tracking link	A private web link the client uses to check their booking. No login needed.

How a client moves through the clinic

This is the “big picture”. The software follows the same path your clinic already follows. Each screen in this guide is one box in the picture below.

2.1 The journey, step by step

The idea in one sentence

The front desk **books** and **collects money**; the therapist **treats**, **writes notes** and **says when the client should return**; the front desk then **books that return visit**.

2.2 The five session statuses

Every client always has exactly **one** status. It shows how their case is going. The therapist sets it when completing a session, and can change it at any time from the client’s profile. Every change is saved in a history, so you can always see who changed it and when.

Status	Use it when...	What happens next
New Case	The client is new and treatment has only just started.	Usually changes to Ongoing after a few sessions.
Ongoing	Regular sessions are in progress.	Stays until the client improves or leaves.
Periodic Follow-up	Regular treatment is finished, but the client comes for occasional check-ins (for example monthly).	A follow-up date keeps appearing.

Terminated	Treatment ended properly, by agreement.	Case is closed. Waiting follow-ups are cancelled automatically.
Dropped	The client stopped coming without finishing.	Case is closed. Waiting follow-ups are cancelled automatically.

Changing your mind is fine

If a Terminated or Dropped client comes back, just set the status again to **New Case** or **Ongoing** and set a new follow-up. Nothing is lost.

2.3 Follow-ups explained

A follow-up is a promise to bring a client back. It is created by the **therapist** (usually when completing a session) and handled by the **front desk**.

A follow-up can also become **Cancelled** (for example when a case is closed or the client no longer needs it).

- A client can have **only one open follow-up** at a time. This stops double reminders.
- If the due date passes and nobody booked it, it turns **Overdue** (shown in red) so the front desk sees it first.
- If the therapist already chose a time, the follow-up is booked straight away and goes into the calendar.

Receptionist guide

Your job: make sure every client is booked, paid, and brought back when the therapist says so.

3.1 Overview — your starting screen

The Overview shows how the clinic is doing right now. You do not have to do anything here; it is a quick look.

Overview. The big card is the **Booking Trend** for the last 14 days. On the right: total clients and bookings **waiting for payment**. Below: Completion Rate, Payments Cleared and Patient Retention. Scroll down for **Upcoming appointments**.

3.2 Appointments — every booking in one list

Appointments. Use the tabs at the top to filter: **All**, **Demo Call**, **Pending**, **Awaiting Payment**, **Verifying Payment**, **Confirmed**, **Completed**, **Cancelled**. Search by name or email. Each row shows the client, their status chip, the service, mode (in-person / online), the therapist, date, time and length.

Tab	Meaning
Pending	A client asked for a time, and the clinic has not accepted it yet.
Awaiting Payment	A payment link was sent. The booking is held until the client pays.
Verifying Payment	The client says they paid (sent a screenshot). A staff member must check it.
Confirmed	The booking is firm. The therapist will see it on the Schedule.
Completed	The session has taken place and the therapist finished it.
Cancelled	The session will not happen.

3.3 New Booking — the 5-step wizard

Use this whenever a client calls, walks in, or messages you. Click the blue **New Booking** button on the Appointments page (or in Patients, or on a lead). A window opens and walks you through **five steps**. A green tick shows each finished step.

Step 1 — Client

- 1
- Type the client’s **phone number**. The software looks for an existing client.

- 2 If the client is found, their details fill in. **Use that record** — do not create a second one.
- 3 If not found, type their **name** (email is optional). Click **Continue**.

The screenshot shows the 'New booking' form with the progress bar at Step 1: Client. The form includes fields for 'PHONE NUMBER *' (9000033333) and 'FULL NAME *' (Sneha Pillai). Below these is a toggle for 'Returning client' (selected) and 'New Case' (5 sessions · last seen Thu, 1 Oct). There is an optional 'EMAIL' field (sneha@example.com) and an optional 'REASON FOR VISIT / NOTES' field (What brings them in? Anything the therapist should know.). At the bottom right are 'Cancel' and 'Continue →' buttons.

Step 1 — Client. The phone number is the key. Searching by phone prevents duplicate clients.

Step 2 — Service

Choose what the client needs. Services are grouped as **Counselling, Therapy, Assessment, Career, Other**. Tap one, then **Continue**.

The screenshot shows the 'New booking' form with the progress bar at Step 2: Service. The 'Service' step is highlighted. Below the progress bar are tabs for 'All', 'Counselling', 'Therapy', 'Assessment', and 'Career'. The main area displays four service cards: 'Initial Consultation' (COUNSELLING, 50 min, from ₹600, 2 therapists), 'Individual Therapy' (THERAPY, 50 min, from ₹1,200, 1 therapist), 'Psychological Assessment' (ASSESSMENT, 90 min, from ₹3,000, 1 therapist), and 'Career & Vocational Guidance' (CAREER, 50 min, from ₹900, 1 therapist). At the bottom right are '← Back' and 'Continue →' buttons.

Step 2 — Service. Only services that a therapist actually offers (with a price) can be chosen.

Step 3 — Therapist

Pick the therapist. Only therapists who offer the chosen service are listed. **A receptionist must always choose a therapist** — you do not have your own calendar.

The screenshot shows the 'New booking' form with the progress bar indicating Step 3: Therapist. The breadcrumb trail is 'Client details → service → therapist → date & time → payment'. The progress bar shows 'Client' and 'Service' as completed steps, 'Therapist' as the current step, and 'Date & time' and 'Payment' as upcoming steps. Below the progress bar, it says 'Therapists who offer Individual Therapy:'. A list of therapists is shown, with 'Dr. Asha Menon' (Clinical Psychologist) selected. To the right of her name, there are two price options: ₹1,500 and ₹1,200, with a checkmark next to ₹1,200. At the bottom, there are 'Back' and 'Continue' buttons.

Step 3 — Therapist. Choose who will see the client.

Step 4 — Date & time

- 1 Choose **In-person** or **Online**.
- 2 Check the **session length** (it fills in from the service; change it only if the therapist asks).
- 3 Pick the **date**. The free times for that therapist appear as buttons.
- 4 Click a time (it turns blue), then **Continue**.

The screenshot shows the 'New booking' form with the progress bar indicating Step 4: Date & time. The breadcrumb trail is 'Client details → service → therapist → date & time → payment'. The progress bar shows 'Client', 'Service', and 'Therapist' as completed steps, 'Date & time' as the current step, and 'Payment' as the upcoming step. Below the progress bar, there are two sections: 'MODE' and 'SESSION LENGTH'. Under 'MODE', there are 'In-person' and 'Online' buttons, with 'In-person' selected. Under 'SESSION LENGTH', there is a dropdown menu showing '50 min (service default)'. Below these, there is a 'DATE' field showing '09-10-2026'. Under the date field, there is a section titled 'AVAILABLE TIMES — DR. ASHA MENON' with buttons for '9:00 am', '12:00 pm', '1:00 pm', '2:00 pm', '3:00 pm', and '4:00 pm'. The '1:00 pm' button is highlighted in blue. At the bottom, there are 'Back' and 'Continue' buttons.

Step 4 — Date & time. Only *free* times are shown. Taken times, leave days and hours outside the therapist's timetable never appear.

Step 5 — Payment

Check the summary card (client, service, therapist, when, mode, fee). Then choose how money will be handled:

Choice	What happens
Collect at the front desk	Session is confirmed now . The amount due appears in Pending Payments for you to collect later.
Client is paying now	You record the money received (amount and method) as part of the booking.
Send the client a payment link	Booking is held as "Awaiting Payment" until the client pays online.

Step 5 — Payment. Click **Confirm booking** to finish. You can go **Back** to fix any step.

Mindesk (Psyfos) User Guide · page 13 of 46

Done. The booking is saved. Click **Done** to close the window. The client can be sent their tracking link.

Time saver

On the **Patients** page, the **New Booking** button already knows the client. On the **Leads** page, **Book session** starts the wizard for that lead.

3.4 Pending Payments — collecting the money

This is your “money to collect” list. It holds every confirmed session where money is still due.

Pending Payments. Grouped into **Overdue** (red, session date passed), **Today** and **Upcoming**. Each line shows the client, session date, the amount due and a **Collect Payment** button. **History** shows earlier payments on that session.

- 1 Find the client and click **Collect Payment**.

- 2 The **amount** already shows the full balance. For a part-payment, type a smaller number — the rest stays in the list.
- 3 Choose the **method**: Cash, Card, UPI, Bank Transfer or Insurance.
- 4 Add a short **remark** if useful (for example “first instalment”). Click **Confirm**.

Collect Payment ×

Arun Kumar · ₹1,500 remaining

Amount Collected (₹)

1500

Enter less than the full balance to record a partial payment — the rest stays in this queue.

Payment Method

☒ Cash ☐ Card ☐ UPI ☐ Bank Transfer

☐ Insurance

Remark (optional)

e.g. first installment

Cancel Confirm

Collect Payment. The amount cannot be *more* than what is due.

Be careful

Always pick the true method (Cash vs UPI). The owner uses this to match the day’s cash with the money in the drawer and the bank.

3.5 Follow-ups — bringing clients back

When a therapist says “see this client again around 15 October”, it lands here. Your job is to give it a real time.

Follow-ups. The four boxes count **Overdue**, **Due today**, **Upcoming** and **Booked**. Tabs: **Needs scheduling** (your to-do list), **Booked**, and **History**. Each row shows the client's status chip, the therapist, the due date and the therapist's note. Icons on the right: ✎ edit, ✓ mark done, ✕ cancel.

- 1 Open the **Needs scheduling** tab. Start with the red **Overdue** rows.
- 2 Call or message the client to agree a time.
- 3 Click **Book session**, pick the date, mode and time, and choose how payment is handled.
- 4 Click **Book session** again. The follow-up moves to the **Booked** tab and a normal appointment is created.

Book follow-up session. The therapist’s note (“Monthly check-in”) is shown at the top so you know why the client is coming back.

Need to add a reminder yourself? Use **Add follow-up** at the top right.

3.6 Leads, Patients, Billing and Monthly Report

Leads

A lead is someone who showed interest but has not booked. Call them, then click **Book session** to turn them into a client with a booking.

Leads. The counters show how many leads exist and how many are **uncontacted**.

Patients

All the clinic's clients with their status chip. Filter by status, search by name, open a profile, or start a booking.

Patients. Everyone registered at the clinic.

Billing

Every invoice, with filters **ALL / UNPAID / Partial / PAID / WAIVED** and a month picker. **Mark Paid** records a full payment.

Billing & Payments. Top: Total Revenue, Outstanding, Paid Sessions and Unpaid Invoices.

Discounts and waiving
Front-desk logins cannot waive or discount a fee. If a client needs a concession, ask the clinic owner.

Monthly Report

One page that tells the whole story of a month. Change the month with the arrows. Use **CSV** to download for Excel, or **Print** to make a PDF.

Monthly Report. Sessions completed, completion rate, clients seen (new vs returning), **follow-up adherence** (how many promised follow-ups really happened), money collected and outstanding, new enquiries, and how clients moved between the five statuses.

Therapist guide

Your job: see the client, write the notes, say how the case is going, and say when the client should return. Everything else is handled for you.

Your menu has six sections: **Schedule**, **My Clients**, **Case History**, **Session Notes**, **Follow-up**, **My Session Reports**.

4.1 Schedule — your day

Schedule. Today's sessions in time order. The four boxes show today's sessions, still to do, completed, and notes pending. Each session card has three buttons: **Open client**, **Case history** and **Complete session**. Use the arrows or calendar to change day, or **Week** to see the whole week.

Week view. A quick look at the days ahead.

Before the session

Click **Case history** on the client's card to read earlier notes in 30 seconds. The chip beside the name (for example *Ongoing, Session 5, Returning*) tells you the client's stage at a glance.

4.2 Complete a session — notes, status, follow-up in one go

After the session, click **Complete session**. One window handles three things so nothing is forgotten.

- 1 **Session notes (optional):** fill the four SOAP boxes — Subjective, Objective, Assessment, Plan. You can skip this now and write them later in **Session Notes**.
- 2 **Session status:** tap one of New Case Ongoing Periodic Follow-up Terminated Dropped. The current status is already selected.
- 3 **Next follow-up:** keep **Schedule one** ticked, choose a **date**, optionally a **time**, and add a **note for the front desk**. Choose "Decide later" for the time if the client will confirm later.
- 4 Read the blue summary line at the bottom, then click **Complete session**.

Complete session Meera Nair · Thu, 8 Oct, 10:00 am

Session notes - optional — you can also add them later

SUBJECTIVE What the client reported

Client feels calmer this week; sleeping better.

OBJECTIVE What you observed

Appearance, affect, behaviour, test results...

ASSESSMENT Clinical impression

Formulation, progress against goals...

PLAN Next steps

Continue weekly CBT; thought record homework.

Session status

• New Case • **Ongoing** • Periodic Follow-up • Terminated

• Dropped

Regular sessions in progress

Next follow-up ☒ Schedule one

DATE 15-10-2026 **TIME** optional Decide later

Cancel **Complete session**

Top: SOAP notes and session status.

Complete session Meera Nair · Thu, 8 Oct, 10:00 am

• New Case • **Ongoing** • Periodic Follow-up • Terminated

• Dropped

Regular sessions in progress

Next follow-up ☒ Schedule one

DATE 15-10-2026 **TIME** optional Decide later

NOTE FOR THE FRONT DESK optional

e.g. Review thought record · bring school report

Without a time the follow-up appears in the Follow-up list for the front desk to book.

Mark this session completed, save your notes, set the status to Ongoing, set the next follow-up for Thu and 15 Oct.

Cancel **Complete session**

Bottom: next follow-up and the summary of what will happen.

All or nothing

The window does everything together: marks the session complete, saves the notes, changes the status, and sets the follow-up. If something fails, **nothing** is half-saved. Just try again.

Choosing Terminated or Dropped

These close the case. The follow-up part is hidden and any waiting follow-up is cancelled. If you chose by mistake, change the status again from the client's profile.

4.3 My Clients and the client profile

My Clients lists *your* clients. Filter by status, search by name, and click one to open their profile.

My Clients. Each client has a status chip.

Client profile ("Client Timeline"). On the right: every session, newest first, with its status. Click **View Details & Notes** on a session to read what was written. On the left: an automatic **Treatment Summary** and an **Export** button. Buttons on top: **Add Note**, **Schedule** (book the next session yourself), **Add Session** (record a past session), **Delete**, and **Flag as High Risk**.

Scroll down on the left to find the **Session status** card. It shows the current status, the next follow-up and the status history. Click **Update** to change the status.

Update session status Meera Nair ×

☐ New Case
 ☒ **Ongoing**
☐ Periodic Follow-up

☐ Terminated
 ☐ Dropped

Regular sessions in progress

REASON optional

Anything worth recording about this change...

Update session status. Pick the new status, optionally write a **reason**, then **Save status**. The change is logged in the client's history.

If you schedule a session yourself

When you click **Schedule** on a profile you can set the session length and leave the payment for the front desk. It then appears in their **Pending Payments** list.

4.4 Case History, Session Notes and Follow-up

Case History

One page to review a whole case. Pick a client on the left; on the right see their details, a summary, and a **timeline** that mixes sessions, status changes and follow-ups in date order.

Case History. The left list can be filtered by status. In the timeline you can see, for example, “Session status: New Case → Ongoing” and “Follow-up set for Sun, 11 Oct”.

Session Notes

Your note to-do list. **Finished but not completed** shows sessions whose time has passed but are not yet completed — click **Complete session**. **Notes to write** lists completed sessions without notes — click **Write notes**.

Session Notes. The orange number in the menu is how many notes are waiting.

Follow-up. Your clients who are due to return.

4.5 My Session Reports

Your own monthly numbers, for supervision or your records.

My Session Reports. Sessions completed, completion rate, clients seen, follow-up adherence, how your clients moved between statuses, and how many **session notes** you have written (the orange line warns you of missing notes). Use **CSV** or **Print** to keep a copy.

4.6 Your Settings

Settings. Your profile, weekly **availability** (the hours clients may book), and **leave days** (days off). Keep these correct — they decide which times the front desk can offer.

Your daily routine

- ☐ Open **Schedule** and read today's list.
- ☐ Before each session, glance at **Case history**.
- ☐ After each session, click **Complete session** (notes, status, next follow-up).
- ☐ At the end of the day, clear the number on **Session Notes**.

Clinic owner guide

You can do everything the receptionist and therapist can. This part covers what only you set up: services, staff, access, settings and your plan.

5.1 Overview and Analytics

Overview. The live picture of your clinic.

Analytics. Charts for bookings, revenue and how many clients return. Use it to see what is growing.

For month-end, use **Monthly Report** (shown in Part 3) — it covers the whole clinic.

5.2 Services — what you offer and what it costs

The screenshot shows the Mindesk Services dashboard. The sidebar is identical to the Analytics page. The main area is titled 'Services' and includes a search bar and an 'Add Service' button. A yellow banner at the top states: '12 services not offered in any mode yet'. Below are six service cards: 1. Initial Consultation (50 min, Counselling), 2. Individual Therapy (50 min, Therapy), 3. Psychological Assessment (90 min, Assessment), 4. Couples Counseling (80 min, Counselling), 5. Family Therapy (80 min, Therapy), and 6. Group Therapy (90 min, Therapy). Each card includes a description, a 'Needs pricing — not bookable yet' label, and a table for 'In-person' and 'Online' pricing, both marked 'Not offered'. Each card also has an 'Active' status indicator and edit/delete icons.

Services. Each card is one kind of session, with its **length**, a **category tag** (Counselling, Therapy, Assessment...) and prices for **In-person** and **Online**. The yellow banner and the “**Needs pricing — not bookable yet**” label mean no price has been set, so clients cannot book it.

- 1 Click **Add Service** (or the pencil on an existing card).
- 2 Give it a **name**, a short description, a **category** (Counselling, Therapy, Assessment, Career or Other), the **duration** and an **icon**. The duration is the same for in-person and online — only the price differs.
- 3 Click **Save Service**.
- 4 Then set the **price per therapist** in **Staff → Schedule & Pricing** (next section).

The screenshot shows the 'Edit Service' form with the following fields and options:

- SERVICE NAME ***: Initial Consultation
- DESCRIPTION**: First-time assessment to understand your needs, history, and goals.
- CATEGORY**: Counselling (selected), Therapy, Assessment, Career, Other
- DURATION ***: 50 min
- DISPLAY ORDER**: 1
- Same for both modes — only price differs.
- ICON**: A grid of 12 icons, with the first icon (a person with a star) selected.
- Buttons**: Cancel and Save Service

Edit a service. The **category** is what groups it in the booking wizard.

Good to know

The software starts with twelve ready-made services (for example Initial Consultation, Individual Therapy, Psychological Assessment) so you do not begin from nothing. Rename or switch off any you do not need.

5.3 Staff — people, prices and access

Staff Management. Therapists are listed under **Psychologists**; front-desk people under **Support Staff**. Each row has: **Schedule & Pricing**, edit, reset password, and a red icon to **disable** a login. Under each name, ticks show what they can open (**Dashboard access**).

Add a person

- 1 Click **Add Staff**. The **New Staff Account** window opens.
- 2 Choose the **Role**: **Receptionist** for the front desk, **Psychologist** for a therapist, or **Staff** for other support people.
- 3 Fill in the **full name**, **job title**, **login email** and a first **password** (at least 8 characters). A photo is optional.
- 4 Under **Dashboard access**, tick what this person may open (see below), then save the account at the bottom of the window.
- 5 Tell them their email and password privately, and ask them to keep it safe.

New Staff Account. Scroll inside the window to reach the access ticks and the save button.

Set a therapist's services, prices and hours

Click **Schedule & Pricing** on a therapist. There are two tabs:

- **Services & Pricing:** for each service switch **In-person** and/or **Online** on and type the **price**. A service is bookable only when at least one is on.
- **Availability:** the weekly hours when that therapist can be booked.

Dr. Asha Menon
Services, pricing & availability

Services & Pricing | Availability

Choose which services this practitioner offers, in which mode, and at what price.

Service	Duration	In-person	Online	Price
Initial Consultation	50 min	☒	☒	800
Individual Therapy	50 min	☒	☒	1500
Psychological Assessment	90 min	☒	☐	3000
Couples Counseling	80 min	☐	☐	

Services & Pricing for Dr. Asha Menon. The two switches on each service control in-person and online; the box below each switch is the price.

Control what each person can open

Support staff always get **Appointments** and **Patients**. Tick the extra boxes — **Billing, Analytics, Settings & Services** — only for people you trust with them. The change works the next time they open the page.

Give the least access needed

Most receptionists need Appointments, Patients and Billing only. Keep “Settings & Services” for yourself or a manager.

5.4 Settings and Subscription

Settings. Five tabs: **Profile** (accept new bookings on/off, photo, bio, and your **public booking link** with Copy / WhatsApp / Email buttons), **Availability**, **Practice Info**, **Payment & Banking** (where clients send money) and **Leave Days**.

Share your booking link

Put the booking link on your website, Instagram or WhatsApp. Clients can then book without a login.

Subscription. Shows your plan status, **days remaining**, trial end date and yearly price. To pay: send the amount to the UPI ID shown, type the **UTR (transaction reference)**, optionally add a screenshot, and click **Submit for Verification**. The platform admin checks it and activates your plan.

Do not let the plan run out

When the trial or plan ends, the whole clinic is **locked** (see Part 8, "Everything is locked"). Pay a few days early and watch the **Days remaining** number.

The client's side & the platform admin

6.1 The public booking page

Every clinic has its own link, for example `your-site/book/your-clinic`. Clients need **no account**. They go through five steps: **Details** → **Practitioner** → **Session** → **Schedule** → **Confirm**.

Booking page, step 1. The client types their name, phone (and optionally email and a note), then continues. They can choose a session type by category, pick a free time, and confirm. If the clinic asks for online payment, they pay and upload a screenshot, and the front desk checks it.

What staff see

The booking appears in **Appointments**. A new person also becomes a **Lead** and turns into a **Patient** once the first booking is completed.

6.2 The client tracking page

After booking, the client gets a private **tracking link** by message or email. It shows the status of the booking and the details. It needs no login. Keep the link private — anyone with it can see the booking.

“Your Booking Status”. The client sees **Confirmed**, their name, date, time and session type.

PART 7

Platform admin

This is for the person who owns the whole platform and looks after many clinics. It uses a different login page, `/admin`. Clinic staff never need it.

Super-admin dashboard. Top cards: total clinics, total individual practitioners, total revenue and total payments. Next: **Subscriptions** by state (Active, Trial, Expired, Suspended) — click a tile to filter the list of clinics below. Then **Payments:** successful, pending and failed. Scroll down for the list of clinics, where you can check subscription payments, activate or suspend a clinic, and help reset a clinic owner’s password.

Problems & how to fix them

Find your problem in the left column. Try the fix in the right column. If it still does not work, tell your clinic owner — and, if you are the owner, see the technical part at the end.

Logging in & access

What you see	Why	What to do
"Too many attempts" or the login does nothing	Too many tries in a short time. This protects the account.	Wait a few minutes. Type the password slowly and check Caps Lock, then try once.
I forgot my password	—	Staff: ask the owner to open Staff and click the key icon to set a new one. Owner: ask the platform admin.
I am thrown back to the login page	Your sign-in expired.	Just log in again. This is normal after a long time away.
My login says it is disabled	The owner switched it off (for example someone left).	The owner can turn it on again in Staff .
"You don't have permission", or a menu item is missing	Your role does not include that screen.	Ask the owner to tick the right box under Staff → Dashboard access (Billing, Analytics, Settings & Services).
Everything is locked, with a message about the subscription or a payment	The trial or paid plan has ended.	Owner: open Subscription , pay, and submit the UTR. The platform admin approves it and the clinic opens again.

Booking & scheduling

What you see	Why	What to do
The service list is empty, or a service says " Needs pricing — not bookable yet "	No therapist offers it yet, or no price is set.	Owner: Staff → Schedule & Pricing → switch on In-person/Online and type a price. Also check Services .
No times are shown for the chosen date	The therapist has no working hours that day, is on leave, or the day is already full. Or the date is in the past.	Try another date or Online/In-person . Owner/therapist: check Availability and Leave Days .

"That time was just taken"	Someone else booked the same slot a second ago.	Click Back , pick another time. No harm done — nothing was double-booked.
I cannot continue past the Therapist step	A receptionist must choose a therapist.	Click a therapist card so it is highlighted, then Continue .
The therapist I need is not in the list	That therapist does not offer the service you chose.	Go Back and change the service, or ask the owner to switch the service on for that therapist.
The client shows twice	The phone number was typed differently.	Always search by the full phone number first. Ask the owner if two records must be tidied.
The client says they did not get a message	Email/SMS are optional extras and may not be switched on.	Copy the client's tracking link and send it yourself. The owner can ask IT to add the email/SMS keys (see below).

Payments & billing

What you see	Why	What to do
I cannot collect more than the balance	The amount is limited to what is due.	Type the exact amount due, or less for a part-payment.
"Someone else changed this" when saving a payment	Two people edited the same invoice at once.	Click Refresh , check the new balance, and try again.
Waive / discount is refused	Front-desk logins cannot reduce fees.	Ask the clinic owner to do it.
Revenue shows ₹0 but sessions took place	Revenue counts only <i>money received</i> .	Record the payments in Pending Payments (or Mark Paid in Billing).
A booking is stuck on "Awaiting" or "Verifying Payment"	The client has not paid, or nobody has checked their screenshot yet.	Check the bank/UPI. If the money arrived, approve it; if not, contact the client.

Sessions, notes & follow-ups

What you see	Why	What to do
I cannot add a follow-up — "already has one"	A client may have only one open follow-up.	Open Follow-ups , then edit or cancel the existing one (or mark it done) and add the new one.

A follow-up disappeared	The case was set to Terminated or Dropped , which cancels waiting follow-ups.	Set the status back to Ongoing or New Case and add a new follow-up.
I completed a session with the wrong status	Mistake while choosing.	Open the client's profile → Session status → Update . Every change is saved in the history.
"Finished but not completed" shows in Session Notes	The session time passed but it was never completed.	Click Complete session next to it.
Notes are still waiting (orange number)	Notes were skipped when completing.	Open Session Notes and click Write notes .
A file will not upload	Files may be at most 3 MB .	Shrink the photo or scan, or split the PDF, then upload again.
I cannot see a client I expect	Therapists see their own clients in My Clients .	Receptionists and owners can see everyone in Patients . Check the spelling or clear the status filter.

Screen & browser

What you see	Why	What to do
The page looks broken or old	The browser kept an old copy.	Press Ctrl + F5 (Windows) or Cmd + Shift + R (Mac).
The first page after a quiet time is slow	The system "wakes up".	Wait ten seconds. This is normal and happens once.
Times look one day or a few hours off	The clinic time zone setting is wrong.	IT: set <code>APP_TIMEZONE</code> (for example <code>Asia/Kolkata</code>) and redeploy.
The chat bubble says it "isn't configured"	The optional AI key is not set.	IT: add <code>AI_API_KEY</code> . Everything else works without it.

For the owner / IT person (technical, but simple)

What you see	Why	What to do
Every user gets errors	The database cannot be reached.	Open <code>your-site/api/v1/health?deep=1</code> . It must say <code>UP</code> . If not, check <code>DATABASE_URL</code> in Vercel → Settings → Environment Variables, and that the database (Neon) is running and within its limits.

Everyone was logged out after an update	The <code>JWT_SECRET</code> value changed.	Put the old secret back, redeploy. Never change it casually.
Emails or SMS do not arrive	The sending keys are missing.	Add <code>RESEND_API_KEY</code> (email) and <code>TWILIO_*</code> (SMS/WhatsApp) in Vercel and redeploy. Also check the spam folder.
Telegram alerts stopped	The Telegram webhook is not set.	Set <code>TELEGRAM_BOT_TOKEN</code> and <code>APP_BASE_URL</code> , then run <code>npm run telegram:webhook</code> once.
Uploads over 3 MB fail	Vercel limits request size to about 4.5 MB.	This is a limit of the host, not a bug. Keep files small.
Too many login attempts from bots	The built-in limiter works per server copy.	Add a Vercel Firewall rate-limit rule for <code>/api/v1/auth/*</code> and <code>/api/v1/public/*</code> .
I need a backup	—	Use the database provider's point-in-time recovery (Neon has it built in). Test a restore once a quarter.

Still stuck?

Write down: **who you are** (role), **what you clicked**, **what you expected**, and **what happened** — plus a screenshot. That lets the owner or IT person fix it in minutes.

Good habits & checklists

9.1 Protecting client privacy

- Client records and session notes are **private health information**. Open them only for your work.
- Use **your own login** always. Never use someone else's.
- **Log out** when you leave a shared computer, and lock your screen when you step away.
- Do not send a client's tracking link to anyone but the client.
- Owners: when someone leaves the clinic, **disable their login** on the same day (Staff → red icon).
- Give each person only the access they need.

9.2 Daily checklists

Receptionist	Owner
☐ Open Follow-ups : book the overdue ones first.	☐ Glance at Overview and the bell.
☐ Check Appointments for Pending / Verifying Payment.	☐ Weekly: check Follow-up adherence in the Monthly Report.
☐ Return calls and clear Leads .	☐ Monthly: print or download the Monthly Report .
☐ Through the day: New Booking for each enquiry.	☐ Keep an eye on Subscription → Days remaining .
☐ End of day: clear Pending Payments for today.	☐ Review who has which Dashboard access .

9.3 One-page cheat sheet

I want to...	Go to...
Book a new session	Appointments → New Booking
Collect money for a confirmed session	Pending Payments → Collect Payment
Bring a client back for the next visit	Follow-ups → Book session
Finish a session and write notes	Schedule → Complete session
Change how a client's case is going	Client profile → Session status → Update
Read a client's whole story	Case History
See my month	My Session Reports (therapist) or Monthly Report (clinic)
Add a new kind of session	Services → Add Service , then Staff → Schedule & Pricing
Add or remove a staff member	Staff → Add Staff / disable icon

9.4 Test logins (test copy only)

Only for the practice/demo copy

These accounts exist only on the demo copy of the software used for training. **Delete these accounts and change every password before real clients are added.**

Role	Email	Password
Receptionist	demo-riya@psyfos.test	Reception#123
Therapist	demo-asha@psyfos.test	Therapist#123
Therapist (2nd)	demo-ravi@psyfos.test	Therapist#123
Clinic owner	demo-owner@psyfos.test	Passw0rd!123
Demo booking page	<code>/book/psyfos-demo-clinic</code>	

The platform admin's email and password are set by the person who installs the software and are not printed here.
